

**Interclerkship Intensive 1 (MAKE UP Assignment)**

Cognitive Issues in the Health Care Setting: Capacity, Ethics, Delirium & Dementia

Subject: **Delirium Assessment & Hypoactive Delirium Workshop**

Faculty: Dr. Michael Perskin

Dr. Caroline Blaum

Dr. Minkey Rindler

**Due Date: Wednesday, April 3, 2013.**

Assignment:

Please review the power point presentation and the online video from the missed workshop. Linked on ALEX: <http://alex.med.nyu.edu/portal/>

- 1) Take the online RAP quiz (you will be sent a link; 7 questions).
- 2) Write a 1-2 page paper with the following information:
  - a) Define the terms hypoactive and hyperactive delirium. If you have seen a case of either on the wards, please describe the case including how the patient presented. If you have not seen a case, you can instead discuss the differential diagnosis/potential causes of each.
  - b) What is CAM and when is it used?
  - c) Please describe HOW to use CAM

Feel free to use outside sources for information in addition to the slides. Please email your papers to Bert Ongkeo ([bert.ongkeo@nyumc.org](mailto:bert.ongkeo@nyumc.org))
