Understanding HTML
(Hypertext Markup Language)

HTML (Hypertext Markup Language) is the set of markup symbols or codes inserted in a file intended for display on a World Wide Web browser page. The markup tells the Web browser how to display a Web page's words and images for the user. Each individual markup code is referred to as an element (but many people also refer to it as a tag). Some elements come in pairs that indicate when some display effect is to begin and when it is to end.

Basic Lesson One

```
<html>
<head>
<title>Saint Anthony School - Students Page</title>

</head>

<body bgcolor="#FFFFFF">
<div align="center">
  <p><font size="+4">Saint Anthony School</font></p>
  <p> </p>
  <p><img src="/stanthony.jpg" width="154" height="185"></p>
  <p> </p>
  <p>Student's name</p>
  <p>Birthday</p>
  <p>Your Grade</p>
  <hr>
  </div align="left"><br>
    What is your favorite food? My favorite food is <br>
    What is your favorite television show? I like to watch<br>
    What type or kind of food do you like to eat? I like to eat<br>
    Do you have any hobbies? My hobbies are<br>
    What kind of sports do you like? My favorite sports are<br>
    What high school would you like to attend? <br>
  <p align="left">What are your future goals?<br>
  </p>
</body>
</html>
